This product has been formulated specifically for sheep and is not intended for other species.

CAUTION: USE AS DIRECTED

CAUTION: Follow label directions. Feeding this feed containing added selenium at levels higher than recommended is not permitted.

FEEDING DIRECTIONS:

Perry Show Lamb 16% B30 is a complete feed for lambs from 50 to 80 pounds. Feed continuously at the rate of 1.0 to 4.6 pounds daily to provide not less than 15 nor more than 70 milligrams of Lasalocid per day. Feed no other grain or roughage once lambs are accustomed to the feed. Lambs should be switched over to this feed gradually to prevent initial over consumption. Always supply a source of fresh, clean water.

CAUTION: The safety of Lasalocid for use in unapproved species has not been established. Do not allow horses or other equines access to feed containing Lasalocid as ingestion may be fatal. For Type A articles or Type B feeds (cattle and sheep): Mix thoroughly with grain and/or roughage prior to feeding. Feeding undiluted or mixing errors may result in an excess Lasalocid concentration that could be fatal to cattle and sheep.
